Art Unit: 3751

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 2-6, 8 and 10-16 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-26 of U.S. Patent No. 6,637,472. Although the conflicting claims are not identical, they are not patentably distinct from each other because the application claims paraphrase the patent claims containing the same elements in the same order but claimed in broader form. For example, application claim 1 contains the same first fluid transfer system, second fluid transfer system and control element as called for in patent claim 1 but omits the limitations of a used fluid container in the first transfer system and the specific structure of the control element being a manual switch since the wording in application claim 1 reads on both manual and automatic switches. In a similar manner application claims 11 and 16 paraphrase patent claim 1, and application claims 7, 9 and 13 paraphrase patent claims 9, 11 and 13 respectively wherein it would have been obvious to one of ordinary skill in the art that limitations could have been omitted from the patented claims in order to obtain a broader legal coverage of the invention.

Art Unit: 3751

3. Claims 2-6, 8 and 10-16 would be allowable if the double-patenting rejection is overcome.

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
